

# WordPress Website Design Packages - Guide

by: Ken Walker

- April, 2020 -

## Single Landing page

► \$1000 to \$3000

These pages are great for providing a specially designed page for a specific marketing program. Or the showcasing of a specific product or service.

## Business Website

► \$2500 to \$6900

Generally used to showcase a businesses services. It may include a small amount of ecommerce functionality but not a full shop.

5 to 10 pages

## Large Business Website

► \$4500 to \$10,000

A large showcase website may include advanced security features due to the businesses world wide reach and generally some use graphical features like interactive charts etc.

10 to 20 pages

## Not for Profit Website

► \$2500 to \$6900

This website package is generally very similar to the normal or large website, in the way it is constructed. But must have a small amount of ecommerce functionality for donation management.

5 to 15 pages

## Small to Large eCommerce Shop

► \$3895 to \$60,000

As a guide this type of shop would have all the functionality of the larger shops but be localised to a state based or national audience. Cyber Security is large feature of this type of website package. At the top end of the package range there would be an ability to have unlimited products. Thus a dedicated server would be required.

Unlimited products (client activated)

## Blogger Website

► \$2500 to \$15,000

A website in this category could be anything from a news website to a personal blog that gets many hundreds of thousand of page views per month. The higher cost of the package would relate to very large news websites. Were increased security and SEO management is required.

Unlimited post (client activated)
